Die Deutsche Gesellschaft für Hirnstimulation in der Psychiatrie (DGHP) lädt Sie zur 14. Jahrestagung ein, die von Mittwoch 2. April bis Freitag, 4. April 2025 in Bozen, Südtirol, Italien stattfindet.

Die Veranstaltung wird vom Vorstand der DGHP in Zusammenarbeit mit lokalen Organisatoren unter der Leitung von Prof. Andreas Conca organisiert, dem ein besonderer Dank für seine Unterstützung vor Ort gilt.

Einer der Höhepunkte der diesjährigen Konferenz wird der Vortrag von Prof. Alberto Priori sein, einem der Pioniere der Hirnstimulation, der die Konferenz eröffnen wird. Außerdem erwarten wir einen spannenden Vortrag von Prof. Giordano d'Urso.

Am 2. April wird ein rTMS-HandsOn-Kurs angeboten, der sich sowohl an Einsteiger, wie auch an Kollegen mit Vorkenntnissen richtet.

Am 3. April haben vor allem junge Forscherinnen und Forscher Gelegenheit, ihre Projekte in sogenannten “flash talks” zu präsentieren.

-IT

La Società tedesca per la Stimolazione Cerebrale in Psichiatria (DGHP) vi invita alla 14ª conferenza annuale, che si terrà da mercoledì 2 aprile a venerdì 4 aprile 2025 a Bolzano, Alto Adige, Italia.

L'evento è organizzato dal Consiglio Direttivo della DGHP in collaborazione con gli organizzatori locali sotto la guida del Prof. Andreas Conca, al quale va un particolare ringraziamento per il suo supporto in loco.

Uno dei punti salienti della conferenza di quest'anno sarà la relazione del Prof. Alberto Priori, uno dei pionieri della stimolazione cerebrale, che darà il via alla conferenza. Possiamo anche aspettarci un'entusiasmante intervento del Prof. Giordano d'Urso.

Il 2 aprile verranno proposti i corsi hand-on per la rTMS, rivolti sia a principianti che ai colleghi con conoscenze pregresse.

Il 3 aprile sono in programma 12 “Flash Talks” per incoraggiare i giovani scienziati a presentare il loro lavoro.
